

EZ Soft HMI™ Soft HMI Ideal for PCs

Run-time Software for your Computer!

NEW

EZSoft HMI is more than just a Soft HMI, it is almost like SCADA. We made an easy to use, simple operator interface that will save you a lot of engineering hours and design time due to its simplicity and ease of use. You don't need prior programming knowledge to design a screen. You do not need to attend any classes to learn how to program EZSoft HMI

It is Intuitive, it is Simple!

**EZ-SOFTHMI
\$495**

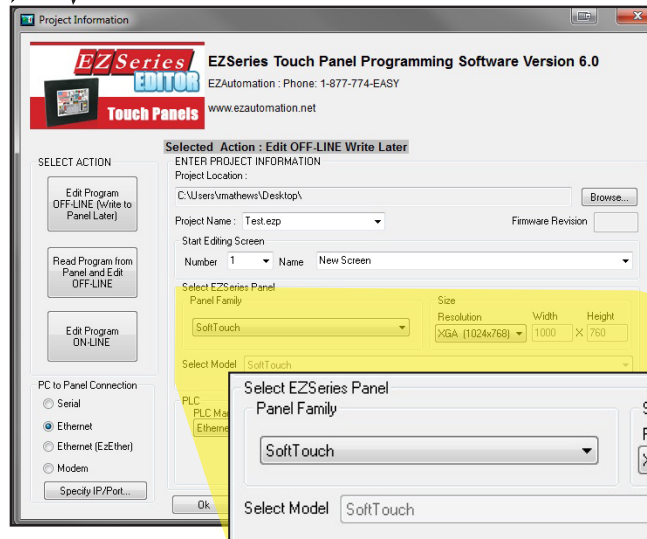

**click here
to get your
New Product
Catalog**

**Program this
Screen in less
than 10 minutes
Simple as 1-2-3**

**Compatible with
Touchscreen devices**

**Scalable to your PC
Monitor's size and
resolution**

**Programmed
Using Same
EZ Software**

**Use your existing
EZ Program with no
conversion needed!**

Unlike other SCADA packages where you have to pay for the software by number of tags and you have to purchase a separate development software package, this simple to learn and use software is ready to go within hours of start. More than 30,000 engineers in North America have universally acknowledged the AVG Software to be the easiest to develop and implement.

EZiest to Develop and Run on Windows

**Most PLC Protocols both Serial and
Ethernet such as Rockwell, Siemens
ISO over Ethernet, Mitsubishi, Omron &
Schneider, Ethernet IP, Modbus TCP/IP**

**No Limit to No. of
Screens or Tags!**

**Available as separate Soft-
ware or integrated Windows
Embedded/HMI Package**

**Operator Friendly
Seamless transition from
your HMI to a PC**
