

AVG File Manager for EZ3 Series

Data Logging Transfer Utility

AVG File Manager is a data acquisition utility, designed to collect and save tag data from one or more (connected and running) EZ3 HMIs. The utility allows the user to take the data stored on the HMI (stored on either USB or microSD) and transfer the data over Ethernet to a designated folder on the Network. It essentially acts as a paperless chart-recorder. Data is transferred instantaneously as soon as the Move/Copy button is initiated.
