**EZPlant View®**

Bird's eye view right from the Comfort of your Desk!!

No Extra Hardware required.
Compatible with any EZTouch HMI with Ethernet

---

**What is Plant View?**

EZPlantView, a new software tool that gives you a bird's eye view of your plant, right from the comfort of your desk. EZPlantView, a $299 software package, can be installed on any Windows based PC in combination with any EZSeries Touchpanel. EZPlantView allows you to monitor a limitless amount of panels simply by identifying their IP addresses. It then shows the status of those panels with user defined colors and conditions. To get a closer look, drill down even further and EZPlantView will automatically display the actual screen using the EZRMC software. This software allows you to monitor or take control of the touch panel without even standing up. Walking miles around the plant is now a thing of the past and finding a new form of exercise will be on your mind instead!

---
