

# EZ 12 Series® Built-in Convenience Email Setup (Gmail, Yahoo, etc.)

The EZTouch Editor 2.0 now has support for sending emails that can be used with any Email Server (Gmail, Yahoo, etc.). The email setup is very fast and easy and allows for the EZ12 panel to send emails if there is an alarm or even on a scheduled basis (such as product count at shift change).

Quickly Configure few of the tabs:

- Email Server Setup
- Email Recipients
- Alarm Email Setup
- Schedule Email
