Super Intelligent Marquee that requires no PLC programming whatsoever.

It simply monitors PLC tags on all networks including DH+
and displays messages pre-programmed in the EZiMarquee
along with PLC tag variables.

Connect to 95% of all PLCs

Call or text Application Hotline at 563-726-1359 or
Email EZMarquee@EZAutomation.net

- Connect to 95% of all PLCs
- Visible to up to 400' away
- Serial, Ethernet IP, Modbus, TCP/IP, Profibus, DeviceNet

Only Marquee that communicates to Rockwell DH+

Display Production Data & Machine Operation Time

TGT 132 ACTUAL 124
Average Time 131 Sec

Display Alarm Conditions

Motor Temp 62C

EZ iMarquee® DH+ Option

**10 Tri-color models
Visible up to 400 ft away,
2" to 8" Character**

**EZ to add to any PLC/Network
NO change in PLC program
whatsoever!**

**The Only LED Message display that can
connect to any PLC Network as a Nodal device,
Monitor tags & Display messages.**

List of Great Features

1. 60°C operation
2. High-bright sunlight readable models
3. 10 NEMA 12 (Indoor) models, 5 sizes & each with DH+ option
4. Uniform brightness over life
5. 100K+ Hour lifetime
6. Scrolling, Blinking & Stationary Messages
7. Mixed character heights on same line for better utilization & readability
8. International character set

Latest Innovation

**EZWifi to program
Marquee without
cable**

*** Uticor our sister division makes all Metal, including
stainless steel, NEMA 4X Smart Marquees that can talk
to DH+, MB+, Profibus, CCLink, Modbus RTU & TCP/
IP, EtherNet/IP, Siemens ISO over TCP/IP, GE SRTP, EZ
Protocols. Call 563-359-7501**

Innovative Unique Features

- The Only LED Message display that can connect to any PLC Network as a Nodal device, Monitor tags & Display messages.
- 8 Tri-color models Visible up to 400 ft away, 2" to 8" Character
- EZ to add to any PLC/Network No change in PLC program whatsoever!
- Import tag database from PLC
- 1/3rd the cost, just \$50 per character
- 1/3rd the weight
- 1/3rd the Power Consumption
- 60°C operation, as compared to 35°C from others
- NEMA 12 (Indoors) models
- Uniform brightness over life
- 100K+ Hours life
- Scrolling, Blinking & Stationary Messages
- Mixed character heights on same line for better utilization & readability
- International character set

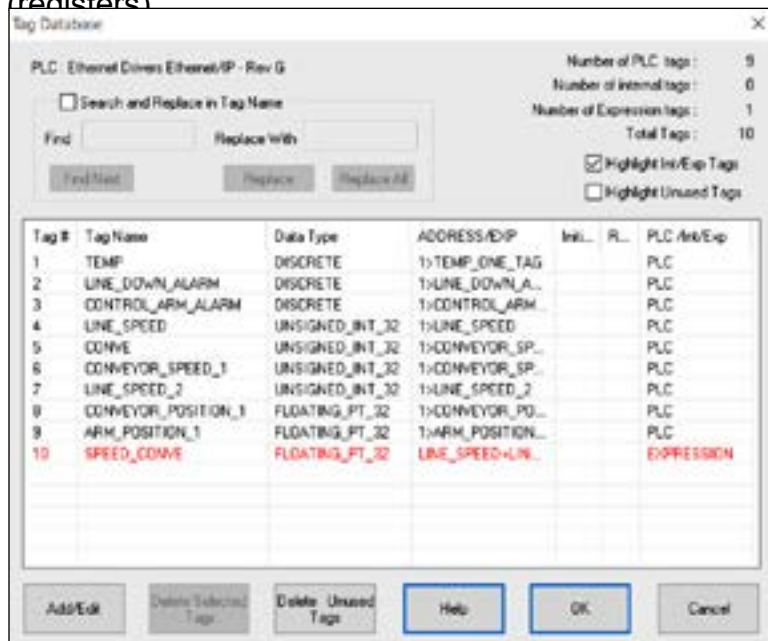

All-in-One Master LED Message Display

Built-In PLC Protocols, Alarm/Message Database & Local Logic

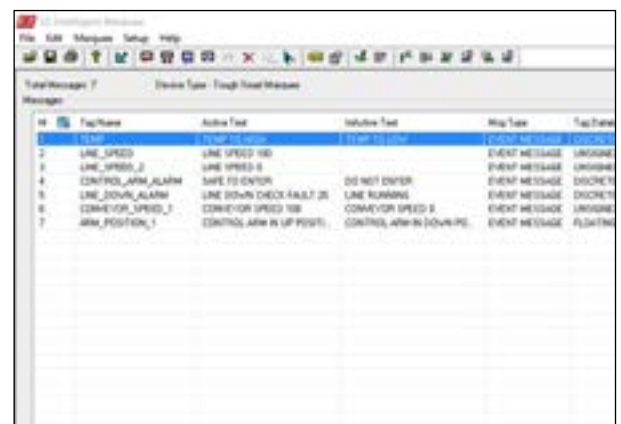

Import tag database from PLC

With EZIntelligent Marquee Software, you can automatically import your tag database via .CSV or Excel format. Once the tags are in the software, you then assign a distinct message for each event (bits) and values (registers).

No PLC Ladder Logic Change!

No ladder logic change required when adding a display to communicate Machine/Process status and alarms to plant floor as long as the data is available in PLC. The EZIntelligent Marquee becomes another node on the PLC network which reads and writes to PLC registers just like an HMI/Operator Interface does.

Alarm/Message database

EZ Intelligent Marquees offer a sophisticated alarm system. You can monitor events (bits) and values (registers). The values can then be monitored for a variety of conditions (=, >, <, in/out of range). The alarms can be selectively displayed, printed and / or logged in a alarm database.

Practically an unlimited # of messages can be stored inside the marquee itself!

Starting at
\$999
2Line 10 Char.

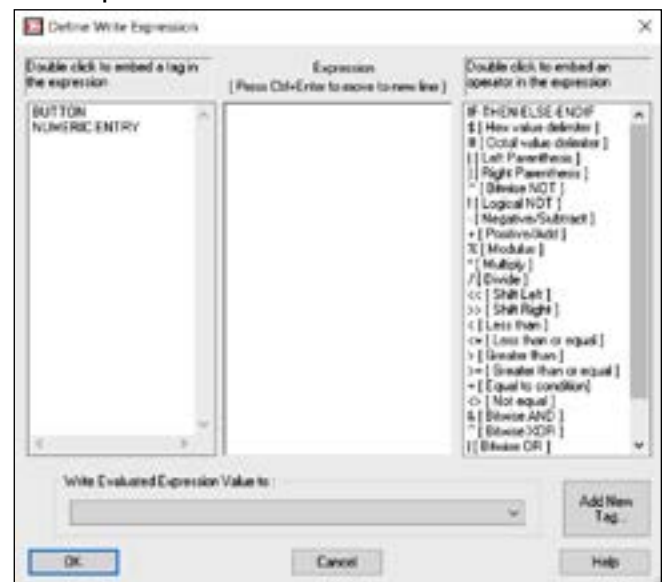

Display & Store User Programmed Messages based on Event (Tag address) and Time

3 Types of Messages: Priority, Alarm & Normal

Each of these user defined messages carry a different weight and can be programmed based on a certain condition or time (See 5-6 for Details)

Math Logic / Scripting

The Intelligent Marquees offer a sophisticated control, called the Multi-function Object. As the name implies, this object allows you to perform multiple functions, including Mathematical and Logical operations on PLC data. For example, you can set/reset multiple bits & transfer constants, variables, and expressions to tags. Remarkably, this benefit allows a user to perform up to 20 operations with one object. Performing these Multiple functions is a very useful feature to offload mathematical & logical computations from the ladder logic to the Marquee.

Most Major PLC Protocols Built-in

- Allen Bradley Ethernet I/P, CIP & DF1
- Siemens S7 & ISO over TCP/IP
- Automaton Direct (K-Sequence, Do-More, Click Series, Productivity etc..)
- Mitsubishi
- Omron
- Modbus RTU & TCP I/P

**Complete Marquee
Driver List:**

Simple Programming Software for PLC Communication & Message Storage

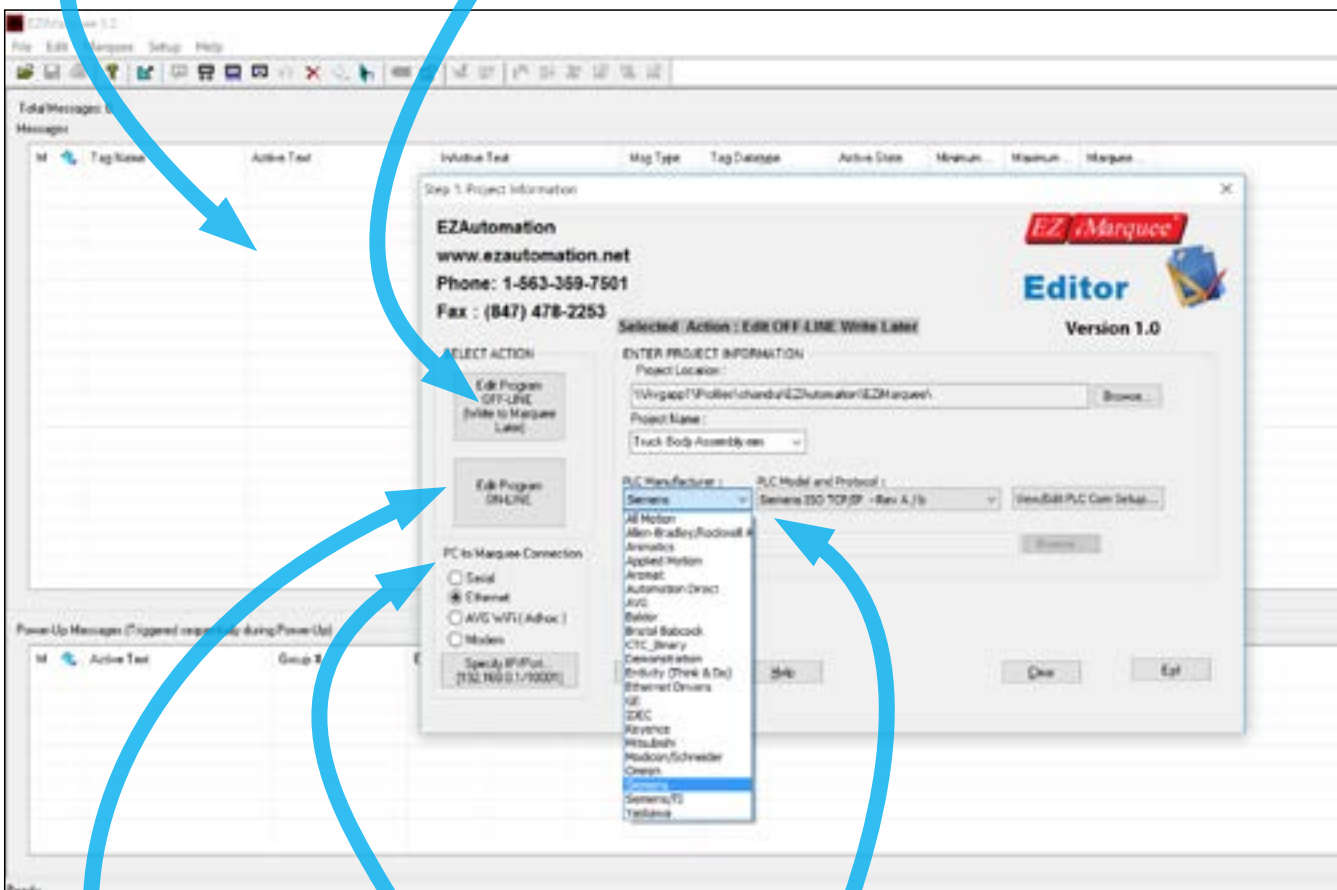

Traditional slave message displays take ASCII strings and are sent from a PC or Programmed into the PLC. With iMarquee, we made it even EZier!

1. Select the PLC Protocol you wish to communicate over
2. Import the tag database directly from the PLC
3. Assign the tag a message in the software based on various conditions you set.
NO PLC logic changes required!
4. Display the message on iMarquee

PLC Manufacturer
Model and Protocol

Add a Marquee to a PLC Network without Changing PLC Program

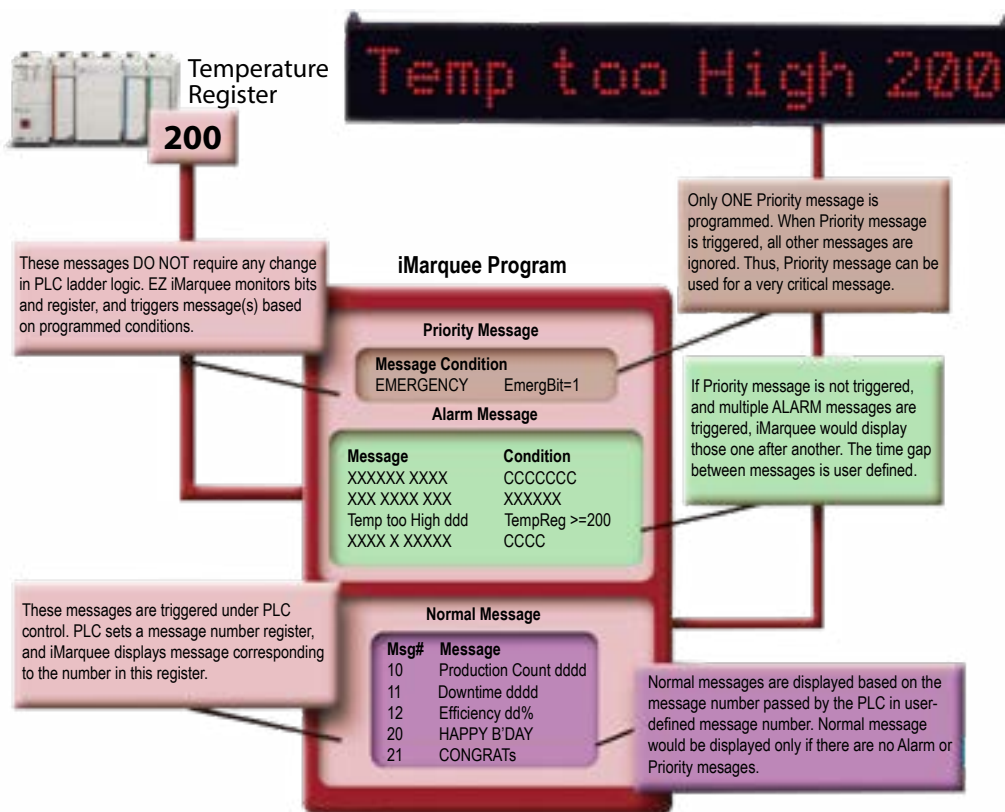

iMarquee now allows you to add a display to communicate Machine/Process status and alarms to plant floor without having to make any changes to PLC program (as long as the data is available in PLC).

- **Easiest to Apply**
No Ladder Logic Change
- **Connectivity**
Major PLC Networks
- **Matched LEDs**
Uniformly Bright Displays
- **Quality**
2 Years Warranty

EZ iMarquee Message Types

iMarquee has 3 types of messages, as shown in the figure below.

1. iMarquee allows you to program a (single) **Priority Message** along with a condition (such as Bit is set, a register is beyond a value or outside a range, etc). iMarquee would continuously monitor the programmed variable, and display this message when the condition is met. No other message is displayed when priority message is displayed, so this is used for only critical messages.

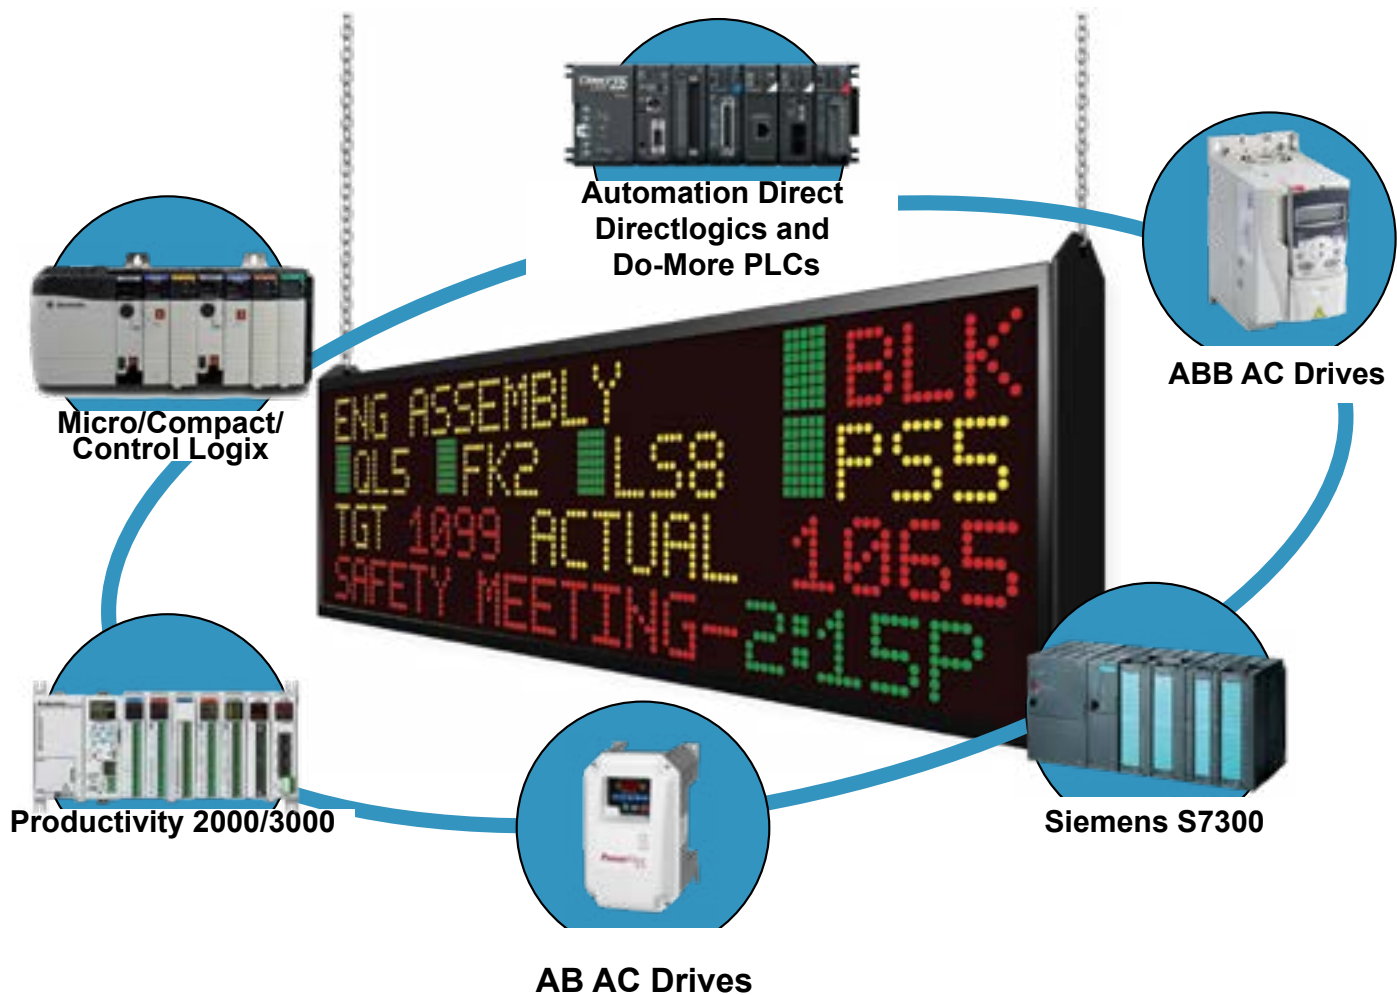

2. The second types of messages are **Machine/ Process Status & alarm messages**. Like the priority message, user needs to program message display conditions. You can program any number of such messages. If multiple messages need to be displayed, iMarquee would cycle through these messages.

3. The **normal messages** are programmed along with a message number, and which of the programmed message needs be displayed is controlled by the PLC. Only for this type of message, you will have to provide logic in the PLC. The Priority and Status/Alarm messages DO NOT NEED to do anything with the PLC program, only its tag contents.

EZ iMarquee

Serial & Ethernet Communication Protocols

EZ iMarquee communicates with known protocols such as:

- *Allen-Bradley Ethernet I/P or DF1 over Ethernet*
- *Automation Direct Do-More, DirectLogics and Productivity Series PLCs over Ethernet*
- *Siemens ISO over TCP/IP*
- *GE SRTP*
- *Modbus TCP/IP*

EZWifi

Connect & Program EZ iMarquee Wirelessly from anywhere in the Plant!

- *On the local network using the infrastructure mode, connect to any EZMarquee device equipped with the EZWifi Module even if a thousand miles away.*
- *Locally, in Ad-Hoc Mode, make a point to point connection with each EZMarquee device equipped with the EZWifi Module for fast and hassle free connectivity.*
- *Easily connect to all EZMarquees suspended in the air throughout the plant from one central PC / Control Room.*

EZ iMarquee Choosing the Right Model

How to Select the right EZ iMarquee for your application requirements

- 1. Determine how many lines of data are required to be displayed all at once (2 or 4 Lines Available)**
- 2. Determine how many characters across are needed to be displayed all at once. (10, 20, or 40 characters across)**
- 3. How far do you need to view the marquee message (100, 200, 300, or 400 ft away)? Note this will determine how many lines of data and characters can be displayed at one time depending on the marquee size selected. See Table 1 for size selection reference to the right.**

Step-by-Step EZ iMarquee Software

Step-1

Edit Program OFF-LINE or ONLINE

Step-2

Determine PC to Marquee Connection for programming: Serial, Ethernet or WiFi

Step-3

Assign Project Name

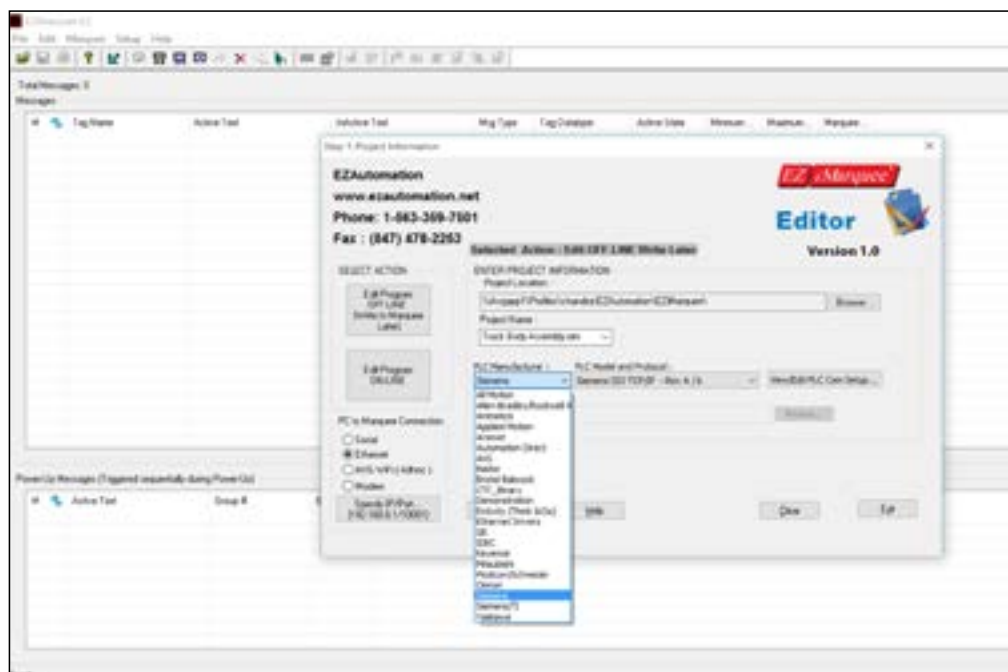

Step-4

Select PLC or Communications protocols to Network

Step-5

Program Messages based on PLC Tag Addresses and send/store in EZ i Marquee

Note: NO PLC Ladder Logic changes required!

iMarquee Size Selection & Viewing Distance

Different Sizes for Different Applications

- 2" characters - readable from 100 feet
- 4" characters - readable from 200 feet
- 6" characters - readable from 300 feet
- 8" characters - readable from 400 feet
- 8" Narrow characters - readable from 400 feet

Display Capacity

(number of characters shown at one time)

Unit	Char. Size	# of Characters per Line
2L10C	2"	2 lines of 10
2L10C	4"	1 line of 5
2L20C	2"	2 lines of 20
2L20C	4"	1 line of 10
2L40C	2"	2 lines of 40
2L40C	4"	1 line of 20
4L20C	2"	4 lines of 20
4L20C	4"	2 lines of 10
4L20C	6"	1 line of 6
4L20C	8"	1 line of 5
4L20C	8"N	1 line of 10
4L40C	2"	4 lines of 40
4L40C	4"	2 lines of 20
4L40C	6"	1 line of 13
4L40C	8"	1 line of 10
4L40C	8" N	1 line of 20

Table 1 shows all standard sizes and maximum number of lines and characters for each character height supported.

You can display characters of different heights in the same line.

2L40C

BIG AND BOLD
SEEN 400 FEET AWAY

**How far do
you need to
communicate?**

2L20C

1L refers to one line or "row" that equals 20 characters (each 2" high).

20C refers to 20 characters, all of which are 2" high.

4L20C

EZAutomation's EZ iMarquee are available in several sizes. The smallest size is called the 2L10C as shown in the chart on the left. The other sizes are multiples of the smallest size, such as 2L20C (shown above) 2L40C (shown below), etc.

EZiMarquee Features & Benefits

EZ to add to any PLC/Network No change in PLC program whatsoever!

Consider EZiMarquee, i for Intelligent, to be an HMI without touchscreen sitting in any PLC network as an intelligent nodal device.

The EZiMarquee can monitor any tags available on the network. For example, an over temperature tag. The iMarquee can monitor and display the temperature and create an alarm if the temperature exceeds a limit. This is all done without changing a single rung in the PLC program. Until now, you may have had a fear of needing to change the PLC program to create a string of over temperature value and send the alarm message to the marquee. With iMarquee there is no need for this, you can simply monitor this particular tag.

Connectivity

All EZiMarquees can communicate to any PLC network, Serial, Hardware protocol or any industrial Ethernet which means EtherNet/IP, Modbus TCP/IP, DH+, Modbus RTU. All serial protocols of all PLCs and EZ protocol. For complete list see communication protocol.

1/3rd the Weight, 1/3rd the Power Consumption

EZAutomation and its sister division Uticor have been the #1 U.S. Supplier of LED message displays since 1985 to monitor, display and improve plant productivity and operation. The EZMarquee is the latest offering in this line of products. Its unique design allowed it cut down power consumption by 2/3rd and in the process reduced its weight also by 2/3rds. Reduced weight allows it to be mounted a lot easier.

1/3rd the Power Consumption allowing Marquee to be operational at 60°C ambient

Most all other Marquees from our competitions limit their operation to 35°C. In fact AB/Rockwell's Inview line would shut itself down if the ambient got over 35°C and due to high power consumption inside the marquee cabinet, the inside temperature would rise by 20°C. Inview had a temperature detector at 55°C to shut it down before it got burnt down and catch fire. Not so with EZMarquee, 1/3rd power consumption allows it be fully functional at 60°C.

****Note: Inview has been discontinued by AB/Rockwell. In fact they no longer offer any Marquees.**

Extremely Cost Effective

EZiMarquee as such has no competition so it is hard to compare cost and Inview or similar marquee attempting to duplicate the functionality of EZiMarquee will have to spend additional \$4000 to simulate an HMI dedicated to this function or use an industrial computer. The EZiMarquee solution in most instances will be 1/3rd to 1/4 the cost of any competitive solution.

Wide Variety of 2 Line 10 Character to 4 Line 40 Character

EZMarquee has 8 different models from 2 Line 10 Character (2") to 4 Line 40 Character, all Tri-color.

NEMA 12 (Indoors) models

EZAutomation offers Indoors (NEMA12) models. Delivery is still off the shelf or 1 week.

Uticor Division Marquees

Our sister division Uticor makes the most rugged Indoor and outdoor all metal marquees, including stainless steel models. You can call Uticor at 563-359-7501

Uniform Brightness over Life

All LEDs age, that is they lose their brightness over a period of time. EZAutomation uses matched LEDs for each marquee so that when the LEDs age, they will age uniformly. You can always tell if a marquee you are looking at is an EZAutomation or Uticor Marquee. When LEDs are not matched, it would start to fade out in different section of the marquee, so some letters would be brighter than others. With EZAutomation, your Marquee will look the same, read the same even 10 years after installation as all LEDs in the marquee have lost their luminous intensity uniformly.

100,000 Hour Lifetime

EZMarquee LEDs lasts at least 100,000 hours, giving our customers a marquee with long, useful life. Our marquees last twice as long as others.

Scrolling, Blinking, Stationary Messages

All EZMarquees have the option of displaying messages that are stationary, scrolling or blinking.

Import tag database and alarm database from PLC

Just like an HMI you can download the tag database and alarm message database from the PLC network connecting to. Storage capacity is practically unlimited.

Mixed Character heights on a single line

EZiMarquees have a unique feature of allowing mixed character heights on a single line allowing

No PLC Ladder Logic Change!

No ladder logic change required when adding a display to communicate Machine/Process status and alarms to plant floor as long as the data is available in PLC. The EZ Intelligent Marquee becomes another node on the PLC network which reads and writes to PLC registers just like an HMI/Operator Interface does.

Most Major PLC Protocols Built-in

- All EZPLC protocols
- Allen Bradley EtherNet/IP & DF1
- Siemens ISO over TCP/IP
- Automaton Direct (K-Sequence, Do-More, Click Series etc..)
- Mitsubishi
- Omron
- DH+ optional
- Modbus RTU & TCP/IP

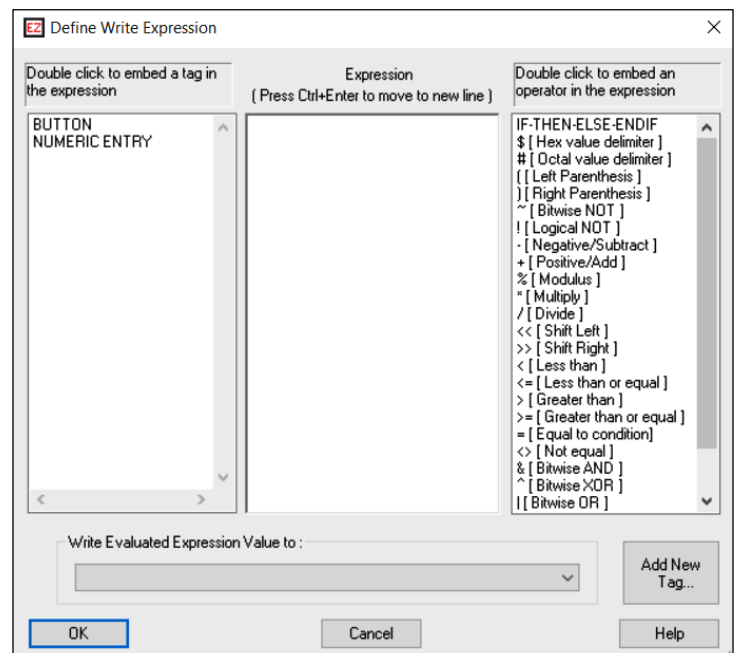

the marquee to, for example allows 2" character with 8" character to make it the most efficient LED message display in the market. The reason you may want to have mixed height characters in the same line would be to have part of the message, for example, temperature reading visible up to 400 ft while the rest is visible only to 100 ft.

International Character Set

EZMarquees can display messages in many languages as you can choose from an international character set.

Math Logic / Scripting

The Intelligent Marquees offer a sophisticated control, called the Multi-function Object. As the name implies, this Object allows you to perform multiple functions, including Mathematical and Logical operations on PLC data. For example, you can set/reset multiple bits & transfer constants or variables or expressions to tags. Remarkably, this Benefit allows a user to perform up to 20 operations with one Object. Performing these Multiple functions is a very useful feature to offload mathematical & logical computations from the ladder logic to the Marquee.

Display & Store User Programmed Messages based on Event (Tag address) and Time

iMarquee has 3 types of messages, as shown in the figure below.

1. iMarquee allows you to program a (single) Priority Message along with a condition (such as Bit is set, a register is beyond a value or outside a range, etc). iMarquee would continuously monitor the programmed variable, and display this message when the condition is met. No other message is displayed when priority message is displayed, so this is used for only critical messages.

2. The second types of messages are Machine/Process Status & alarm messages. Like the priority message, user needs to program message display conditions. You can program any number of such messages. If multiple messages need to be displayed, iMarquee would cycle through these messages.

3. The normal messages are programmed along with a message number, and which of the programmed message needs be displayed is controlled by the PLC. Only for this type of message, you will have to provide logic in the PLC. The Priority and Status/Alarm messages DO NOT NEED to do anything with the PLC program, only its tag contents.

Temperature Register

200

These messages DO NOT require any change in PLC ladder logic. EZ iMarquee monitors bits and register, and triggers message(s) based on programmed conditions.

10 Production Count dddd

11 Downtime dddd

12 Efficiency dd%

20 HAPPY B'DAY

21 CONGRATS

Only ONE Priority message is programmed. When Priority message is triggered, all other messages are ignored. Thus, Priority message can be used for a very critical message.

If Priority message is not triggered, and multiple ALARM messages are triggered, iMarquee would display those one after another. The time gap between messages is user defined.

Normal messages are displayed based on the message number passed by the PLC in user-defined message number. Normal message would be displayed only if there are no Alarm or Priority messages.

These messages are triggered under PLC control. PLC sets a message number register, and iMarquee displays message corresponding to the number in this register.

Temp too High 200

EZ iMarquee - 2 Lines 10 Characters

2 Lines 10 Characters - NEMA 12

The 2 Line 10 Char EZ iMarquee can hold up to a maximum of 10 characters (2") per line and features 2 lines of Tri-Color LEDs. EZ iMarquees are enclosed in NEMA 12 extruded aluminum housing with NEMA ICS 2-230 level of electrical noise immunity. All 2 Line 10 Character models are capable of communicating over RS232, RS422/485 and Ethernet. This is a Master and Slave LED Message Display with built-in PLC protocols and data logger.

Characteristics:

Character Height:	2" / 4"
Characters per Line:	10 / 5
Number of Lines:	2 / 1
Visibility:	100' / 200'

2 Lines 10 Characters feature:

- 2 lines of 10 characters max
- Pre-matched LEDs
- 24 Hour Burn-In tested
- International Character Set
- Hang Mounting
- NEMA 12 Housing
- NEMA ICS 2-230
- 110/220 VAC Power Input
- Surge Protection
- 100,000+ Hours Rated Life

iMarquee features:

- Built-in PLC Protocols to Major Brand PLCs
- Store messages locally on the EZ iMarquee
- No PLC Ladder Logic Changes required to display plant / machine messages or alerts
- Datalogging Built-in
- Webserver with Remote Access
- Built-in Message Database
- Built-in Alarm Database
- Advanced Scripting/Logic within the Marquee Display itself

- NEMA 12 Housing
- NEMA ICS 2-230
- 110/220 VAC Power Input
- Surge Protection
- 100,000+ Hours Rated Life

iMarquee features:

- Built-in PLC Protocols to Major Brand PLCs
- Store messages locally on the EZ iMarquee
- No PLC Ladder Logic Changes required to display plant / machine messages or alerts
- Datalogging Built-in
- Webserver with Remote Access
- Built-in Message Database
- Built-in Alarm Database
- Advanced Scripting/Logic within the Marquee Display itself

Model Number	Interface	Price	Del.
EZiMT-2L20C	RS232, RS422/485 and Ethernet included	\$1599	7 DAY

2 Lines 20 Characters Dimensions

EZ iMarquee - 2 Lines 40 Characters

2 Lines 40 Characters - NEMA 12

The 2 Line 40 Char EZ iMarquee can hold up to a maximum of 40 characters (2") per line and features 2 lines of Tri-Color LEDs.

EZ iMarquees are enclosed in NEMA 12 extruded aluminum housing with NEMA ICS 2-230 level of electrical noise immunity.

All 2 Line 40 Character models are capable of communicating over RS232, RS422/485 and Ethernet. This is a Master and Slave LED Message Display with built-in PLC protocols and data logger.

Characteristics:

Character Height:	2" / 4"
Characters per Line:	40 / 20
Number of Lines:	2 / 1
Visibility:	100' / 200'

2 Lines 40 Characters feature:

- 2 lines of 40 characters max
- Pre-matched LEDs
- 24 Hour Burn-In tested
- International Character Set
- Hang Mounting
- NEMA 12 Housing
- NEMA ICS 2-230
- 110/220 VAC Power Input
- Surge Protection
- 100,000+ Hours Rated Life
